

EMMA ID: 05684

Gene: *Fubp1*

Common name: *Fubp1* (*far upstream element (FUSE) binding protein 1*)

Allele: *Fubp1*^{Gt(A033A08)Wrst}

Genotyping Information

Genotyping by end-point PCR based on gel is composed of a genespecific short range PCR using primers on wild type allele and a mutant allele-specific short range PCR. The combined results show the genotype of the mice. For example: mutant positive, wild type positive = Heterozygous.
